TECHNICAL SKILLS

Frontend: React.js, HTML, CSS, Javascript
Backend: Node.js, PostgreSQL, Python
Developer Tools: GitHub, Git, Netlify, VS Code, Postman, Heroku, Vercel

PROJECTS

Human Resource Foundation Asylum App, *Backend Engineer,* Github Link   Remote | July 2021
- Used Node.js to create editable profile pictures for users.
- Utilized AWS S3 for storage, this was used to store a link of the picture for faster and smaller storage.
- Used Node.js to create the backend points to facilitate transfer of information between the image received by the user and the storage platform, or AWS S3.

Water My Plants, *Backend Engineer,* Github Link ✅   Remote | March 2021
- Used Node.js to create endpoints, using in-process caching of static data and returning asynchronous partial responses to satisfy queries on large indices
- Used Node.js in conjunction with PostgreSQL to develop a login for superusers to label and track plant data

Pintereach, *Frontend Web Developer*, Github Link ✅   Remote | January 2021
- Used React.js and CSS to create dynamic chart visualizations showcasing article statistics
- Translated user-centered scenarios into conceptual sketches, wireframes, and prototypes under a rapid timeline
